EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel withdrawn claims 4-14 and 17.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach an axial flow fan motor having for a cooling unit where the fan motor is disposed on one side of a heat sink to direct cooling air into the interior of the heat sink for air cooling and is disposed on the side of the heat sink opposite a heat generating device, where the fan motor includes a rotor with a plurality of fan blades attached to the outer circumferential surface of the rotor and which is rotatable about a central axis, with the motor having a casing with an outer peripheral surfaces that is coaxial with the rotor between axially opposing inlet and outlet faces which are centered on the central axis, where the casing surrounding the rotor and blades defines an axial flow passage coaxial with the rotor for cooling air flow through the inlet through the casing between the rotor and the casing and exiting through the outlet face; where the motor includes a bearing holder on which is fixed a stator of the motor to be disposed inside the rotor with the bearing holder supporting the rotor fixed on rotary shaft of the motor via a bearing

and which connects the stator to the casing, where the casing includes a plurality of identical metal plates each having an outer edge continuous around and coincident with the outer periphery surface with opposing continuous planar surfaces oriented perpendicular to the central axis and having a central opening surrounding the axial flow path and centered on the central axis, wherein the plurality of identical metal plates laminated together with the continuous planar surfaces in continuous face-to-face contact with each other and arranged side-by-side along the axial direction of the rotary shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.
